TALHA NADEEM

FULL STACK DEVELOPER

CONTACT

✉ talhanadeem@nexvistech.com

SKILLS

- PHP / JavaScript / CSS / HTML
- Laravel / OpenCart / Drupal
- Python / Django
- SQL / MySQL / SQLite
- Linux / Google Workspace / JIRA / Docker
- WordPress / Bootstrap
- jQuery / Node.js / React.js / VUE
- GIT / BitBucket / Git Bash / Git Desktop / GitHub
- Postman / Cloud Services / Firebase

COMPETENCIES

- Back-end Programming
- Web Development
- Database Management
- Version Control
- VS code, Dreamweaver, PHPStrom
- API's Development & Integration
- Paypal Express Checkout / Authorize.net / Stripe
- Google Maps / Facebook APis / Twitter APIs / Google Vision
- Website optimization / Project Management / Agile Workflow

WORK EXPERIENCE

Full Stack Web Developer

NexVisTech   2022 - Ongoing

- Designed and developed efficient and maintainable software according to the business objectives and needs of various clients.
- Led end-to-end development of web applications, from conceptualization and architecture to deployment.
- Worked closely with UI/UX designers, project managers, and QA teams to ensure project alignment and successful delivery.
- Developed RESTful APIs using Express and integrated them into front-end applications for real-time data synchronization.
- Implemented secure authentication and authorization systems, integrating OAuth2 and JWT for user access control.
- Planned website development, converting mockups into usable web presence with HTML, JavaScript, AJAX, and JSON coding.
- Developed app integration with REST / SOAP and other APIs for Google Maps,
- social media logins, payment processors, and other services.
- Regularly updated knowledge of the latest industry trends in web development and related technologies.
- Maintained complex technology infrastructure and collaborated with the product.
- Evaluated and integrated new technologies and frameworks to enhance application features, performance, and maintainability.

Senior Web Developer

Canva Solutions   2021-2022

- Orchestrated end-to-end development of dynamic web applications, from front-end interfaces to back-end services.
- Implemented real-time features using technologies like WebSockets to enhance user experience.
- Utilized Git for version control, ensuring efficient collaboration and codebase management within development teams.
- Developed back-end components to connect applications with web services.
- Designed and managed relational databases using SQL (e.g., MySQL) for efficient data storage and retrieval.
